On arrival at the food of the Institute there was some throwing of beach hats by both sides. The police, who had been bold well in hand, were vigorously marched to the scene of disorder. The procession entered the Institute with the flag, about six or eight remaining outside. A row occurred between a policeman and one of those colored men, a shot was again fired by one of the parties, which led to an indistriminate fire on the building, through the wimlows, by the policemen. This had been going on for a short time when a white flag was displayed fro the window of the Institute, whereupon the f ing crased and the police rushed into the build-

In the yard of the building whither some of the colored men had recaped and partially serveted themselves, they were fired upon and killed or wounded by policemen. Some men were killed and wounded several squares from the some. Members of the convention were wounded by the policemen while in their hands as prisoners, me of them mortally.

The immediate cause of this terrible affair was

the assembling of this convention. The remote cause was the bitter and antagonistic feeling which has been growing in this community since the advent of the present Mayor, who, in the organization of his police force, selected many SARATOGA SPRING WATER, sold by desperate men, and show of them known mur-derers. As to the merciles manner in which the convention was broken up, I feel altiged to confess strong repugnance. It is useless to attempt to disguise the hostility that exists on the pair of a great many here towards Northern men; and this unfortunate affair so precipitated matters, that there is now a test of what shall be the states of Northern men; whether they can live here without being in constant drawfor not; whether they can be protected in life and preperty, and have justice in the courts.

If this matter is permitted to puse over with out a thorough and determined prosecution of those engaged in it, we may look out for frequent scenes of the same kind, not only here but in other places.
